How can YOU stay safe online?

1. **Be You:**
   Never pretend to be someone that you are not. Be who you really are, and you will attract people who will become your real friends.

2. **Be nice:**
   Do not say mean things just because you are online. Your words hurt the same as if you would say them to the person's face.

3. **Think about what you post:**
   Remember that once it is out there, anyone can see it.

4. **Do not add people you do not know on social media accounts:**
   Having friends and followers is fun but can be dangerous when you don't really know them.

5. **Never send inappropriate pictures to peers or strangers:**
   Never. Never. Never.

6. **Never give your personal information to anyone on social media:**
   Do not tell anyone your address, what city you live in or what school you go to.

7. **If you are unsure about something, talk to someone you trust:**
   Never feel like you must continue talking to or interacting with someone if it makes you feel uncomfortable.
