

02/17/23

We appreciate you may have ongoing concerns about your safety in light of the train derailment in East Palestine. At this time, we must rely on the information that the experts in their field provide to us. To that end, our team, including our certified water operator, has been in constant contact with the Ohio EPA. The Ohio EPA has not identified an impact to the drinking water in our area, is not requiring any actions for water systems in our vicinity and has publicly stated that water is safe to drink. Ongoing up-to-date information is available at the following websites (Federal EPA, Ohio EPA and Ohio Emergency Management Services)

Federal EPA:

https://response.epa.gov/site/site_profile.aspx?site_id=15933

Ohio EPA:
